

ARO

Natural Gas Driven Diaphragm Pumps

From ARO, the world-leader in stall and ice-free pump technology, comes three new natural gas driven diaphragm pump models. Introducing the new CSA Certified diaphragm pumps. CSA (Canadian Standards Association) is internationally known for standards and certification of equipment that is powered by natural gas. These pumps are the ideal answer to fluid handling operations in remote locations, such as oil and gas facilities, where sweet natural gas is an available energy source. Combined with ARO's patented valve technologies, these gas-driven pumps have the wetted and body materials to deliver superior fluid compatibility and performance in a portable package.

Features:

- **Ice-free, stall-free operation**
- **Bolted construction for leak-tight material integrity**
- **All-metal construction**
- **Big delivery:** flows up to 133 LPM
- **Lube-free operation**
- **Grounding strap included with pump**
- **Ported exhaust**
